

PRORUNNER® mk1: reliable and affordable product lift

The PRORUNNER® mk1 is a solid product lift which does what it has to do day in day out and year in year out, that is to say lifting and lowering products without you having to bother about it. It offers the perfect solution for capacities of up to a maximum of 300 products/hour. Because of its extremely small footprint, this lift can fit into almost any lay-out. The compact unit is very easy to incorporate into your transport system and can be fitted with a roller conveyor or a conveyor belt as you see fit. On account of its design which makes use of extremely reliable components, the machine requires hardly any maintenance. In a nutshell, it is a product lift which is easy to incorporate into your business and which continues to be available at an affordable price.

Advantages of the PRORUNNER® mk1

- Minimum footprint
- Suitable for vertical sorting (several heights)
- Right-angle arrangement also possible
- Boxes, crates and sacks up to 100 kilograms
- No more lubricating or tightening of chains
- Steel and thus solid construction
- Low noise
- Robust and low maintenance
